

ABSTRACT

Use of Alpha-1 antitrypsin for the preparation of medicaments for the treatment of fibromyalgia.

The invention is based on the use of alpha-1 antitrypsin for the preparation of medicaments for the treatment of fibromyalgia, comprising the preparation of therapeutic concentrates of alpha-1 antitrypsin, in any form of administration tolerated by humans, the alpha-1 antitrypsin being obtained by purification of human plasma or being produced by recombinant or transgenic technology, with doses equal to or greater than 6 mg of alpha-1 antitrypsin per kg of body weight for a variable period of time.
